AI can help fighting climate change

But also increasingly contributes to it

Expectations:

- ❑ High speed data processing
- ❑ Lower energy consumption per operation

Photonics' advantage:

- ✓ Linear combinations are "lossless"
- ✓ Reduced latency

AI HARDWARE THAT REQUIRES LESS ENERGY

> Silicon photonics

**200 times less energy
than Google TPU**

**Neuromorphic photonics can offer
sub-nanosecond latencies,
high-bandwidth
& low energies**

- > CMOS-compatible platform
- > 12" wafer process

#AirPollution

Air pollution is a major environmental risk to health.
By reducing air pollution levels, countries can reduce:

Every year, around
7 MILLION DEATHS
are due to exposure from both outdoor
and household air pollution.
